“Organized spaces”

Make it happen with Dupanel Slat Wall

Dupanel[®]
SLAT WALL

It is a fiberboard laminated with a decorative TFL into which several slots are made throughout the piece.

A) BENEFITS

- Allows goods to be accommodated in multiple ways, providing a high level of turnover to items within the store.
- When the entire range of products on display is exposed, the client generates awareness of what he can obtain in the commercial premises with the naked eye.
- Practical, since it is installed very easily.
- With proper care it can be disassembled and adapted to a new area as required.
- It not only supports the exhibition, but also creates a pleasant environment.

C) TECHNICAL SPECIFICATIONS

THICKNESSES									
THICKNESS COMMERCIAL (in)	THICKNESS COMMERCIAL (mm)	THICKNESS FINAL (in)	THICKNESS FINAL (mm)	WIDTH (in)	LENGHT (in)	THICKNESS (in)	WIDTH (in)	LENGHT (in)	SQUARENESS (in)
3/4	18.0	0.7087	18.0	48	96	+/- 0.0078	+/- .078	+/- .078	+/- .078

D) STORAGE AND HANDLING

- Keep the straps when moving the material through a mechanical way; this facilitates the loading and unloading of the product and avoids slipping and rubbing between one board and another.
- Store indoors and in a dry place.
- Covering the boards with plastic or tarpaulins protects and preserves them in climates or extreme conditions.
- Avoid extreme variations in temperature and humidity.
- Do not allow the surfaces and edges of the board are in direct contact with water.
- Maximum height of a package: 32 inches.
- Maximum stowage height: 7 packages.
- In the stowage, use separators between packages (preferably 4) placed between them approx. 28 in., taking care of the
- Alignment of packages. This practice also helps keep the board from absorbing moisture from the floor.
- Maintain a minimum distance between pallets of 8 inches approx.
- Do not stow vertically.

B) APPLICATIONS

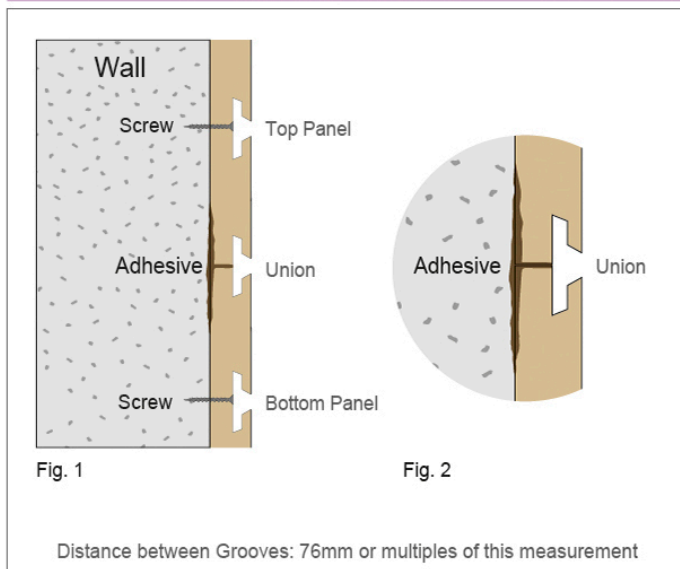

- Ideal to decorate, organize and make home and commercial spaces more efficient.
- Store fixtures.

DIMENSIONS AND PIECES PER PACKAGE			
FORMAT STANDARD	WIDTH (in)	LENGHT (in)	PIECES/ UNIT
4' x 8'	48	96	34

E) RECOMMENDATIONS

- **Manual cut:** Use a thin metal saw.
- **Cut with a jigsaw:** Use a fine-tooth saw with sway control.
- **Saw cut:**
 - The cut should be made with the decorative side facing up.
 - Use a motor with a minimum of 2 hp and 3,500 to 5,000 r.p.m. Using a tungsten carbide tooth is recommended.
 - Choosing a saw with a smaller diameter increases stability and cut quality.
 - For thicknesses greater than 5/16", choose preferably between 48 and 72 teeth saw.
- **Drilling:** Use a high-speed drill with a straight-pointed steel bit. The perforations in the edges must be made in the center, not exceeding 50% of the thickness of the board deep.
